

Kelly Druten Green

Statement of Interest

I have been a member of NALP since 2006 and have always found great value in the organization, especially its members. My career has been richer for the knowledge and the relationships I have gained through membership, including attendance at several NALP events and webinars. The networks and information sharing have been especially helpful for someone who is working in a smaller market (Kansas City). The commitment of our members to educate and support one another is exemplary, and I would cherish the opportunity to serve on the Conference Planning Committee and give back to an organization that has served me so well.

Summary: Proven Talent Leader with experience guiding Learning and Development, Talent Acquisition, Leadership Development, Performance Management, and Change Management. Demonstrated ability to build solid relationships with executives across multiple departments and locations to implement strategic initiatives and achieve desired results.
